REHAB FACILITY

226 West Erie Street
Linesville, PA 16424

DETOX

Our rehabilitation process is focused on achieving health and wellness. Our medical team uses treatment and medications to ease the detoxification process safely, quickly, and efficiently.

TREATMENT

Our treatment is holistic to the body, mind, spirit and is completely focused on the individual. You will engage in group counseling, individual therapy, outdoor recreational and therapeutic activities, and highly individual treatment planning. You will be able to engage with your family and support system in our inpatient treatment through our Family Program. A dedicated counselor will lead family group counseling sessions and can also schedule individual family sessions as needed.

ASAM Criteria

The ASAM Criteria is the nation's most widely used and comprehensive set of guidelines for placement, continued stay, and transfer/discharge of patients with addiction and co-occurring conditions.

REHABILITATION

Our team of medical professionals uses combinations of evidence based approaches and treatments to achieve recovery and lasting wellness. Individualized counseling, lifestyle coaching, health management, and spiritual support are used to better people's lives.
